

Possibilities

There are so many unique animal habitats - they all show possibilities for animal's lives!

Coconut Crabs - they make their homes in coconut trees. Did you know that coconut crabs can actually crack open a coconut and eat what's inside!

Japanese Snow Monkeys make their homes in the cold mountains and warm up in bubbling hot springs!

Tree Frogs make their homes inside pitcher plants.

Squirrels can make their homes in cities with people!

Imagine that you are a squirrel living in a city park. Can you imagine all the possibilities for finding acorns and other types of food? Can you imagine all the possible places you can make your home? Life is full of possibilities - always keep your mind and heart open to them.
